A REGULATION LIMITING TOBACCO AND NICOTINE ACCESS BY YOUTH  
(“YOUTH ACCESS REGULATION”)  
(As Amended on December 1, 2011)

WHEREAS there exists conclusive evidence that tobacco smoke causes cancer, cardiovascular disease, respiratory disease, negative birth outcomes, allergies, and irritation to the eyes, nose, and throat; and whereas the majority of all smokers begin smoking as teenagers; an estimated three thousand (3,000) minors begin smoking every day in the United States; and the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin; and despite state laws prohibiting the sale of tobacco products to minors, access by minors to tobacco products remains a major problem;

WHEREAS the U.S. Food and Drug Administration has conducted laboratory testing which found that e-cigarettes contain toxic chemicals and carcinogens; and has further determined that the use of certain unregulated nicotine delivery products, which contain addictive nicotine, present a strong potential for subsequent use and addiction to tobacco products, particularly among youth; and e-cigarettes and other unregulated nicotine delivery products are not approved for tobacco cessation; and the present regulatory gap in state and federal law allows for these products to be sold to minors;

WHEREAS nicotine has been found to increase blood pressure, respiration and heart rate and has been observed to contribute to cardiovascular disorders including cardiomyopathy, peripheral vascular disease, atherosclerosis, hypertension, direct coronary spasm and ischemia, potentially leading to coronary artery disease and myocardial infarction;

WHEREAS in a Massachusetts sample of 5,000 youth age twelve to eighteen years, 16.4% reported they had smoked a cigar; and whereas youth cigar use has grown in Boston, even as youth cigarette smoking decreased nearly 50% between 1995 and 2009; the price of a pack of cigarettes can be more than ten times the price of a single cigar since minimum packaging requirements, bans on flavoring, and certain taxes do not presently apply to cigars; and lower priced cigars are attractive to youth looking for a less expensive alternative to cigarettes; and nicotine levels in cigars are generally much higher than nicotine levels in cigarettes;

NOW THEREFORE, in furtherance of its mission to protect, promote, and preserve the health and wellbeing of Boston citizens and pursuant to the authority granted to it under M.G.L. c. 111 § 31, the Boston Public Health Commission enacts A Regulation Limiting Tobacco and Nicotine Access by Youth (hereinafter “Youth Access Regulation” or “Regulation”) as follows:
