This Week ILI% (Week 3)	3.16%
Last Week ILI% (Week 2)	2.77%
State/National ILI Surveillance**, +	
This Week Massachusetts ILI% (Week 3)	4.21%
This Week National ILI% (Week 3)	5.00%

Season-To-Date Hospitalization (through MMWR WK 3)		
SEASON	# HOSPITALIZED	% HOSPITALIZED
2019-2020	132	11
2018-2019	119	17

Summary: As of 1/18/2020, a total of 1,243 cases of laboratory-confirmed influenza in Boston residents have been reported to the Boston Public Health Commission (BPHC) since 9/29/2019. One hundred and thirty-two cases (11%) have been hospitalized. No influenza-associated deaths have been reported to date. Emergency department visits for influenza-like illness (ILI) comprised 3.16% of all Emergency Department (ED) visits this week. Geographic distribution of influenza activity in Massachusetts is *widespread*. Intensity of ILI in the State is *high*.

Providers should continue to offer vaccine to all persons ≥6 months of age until May.

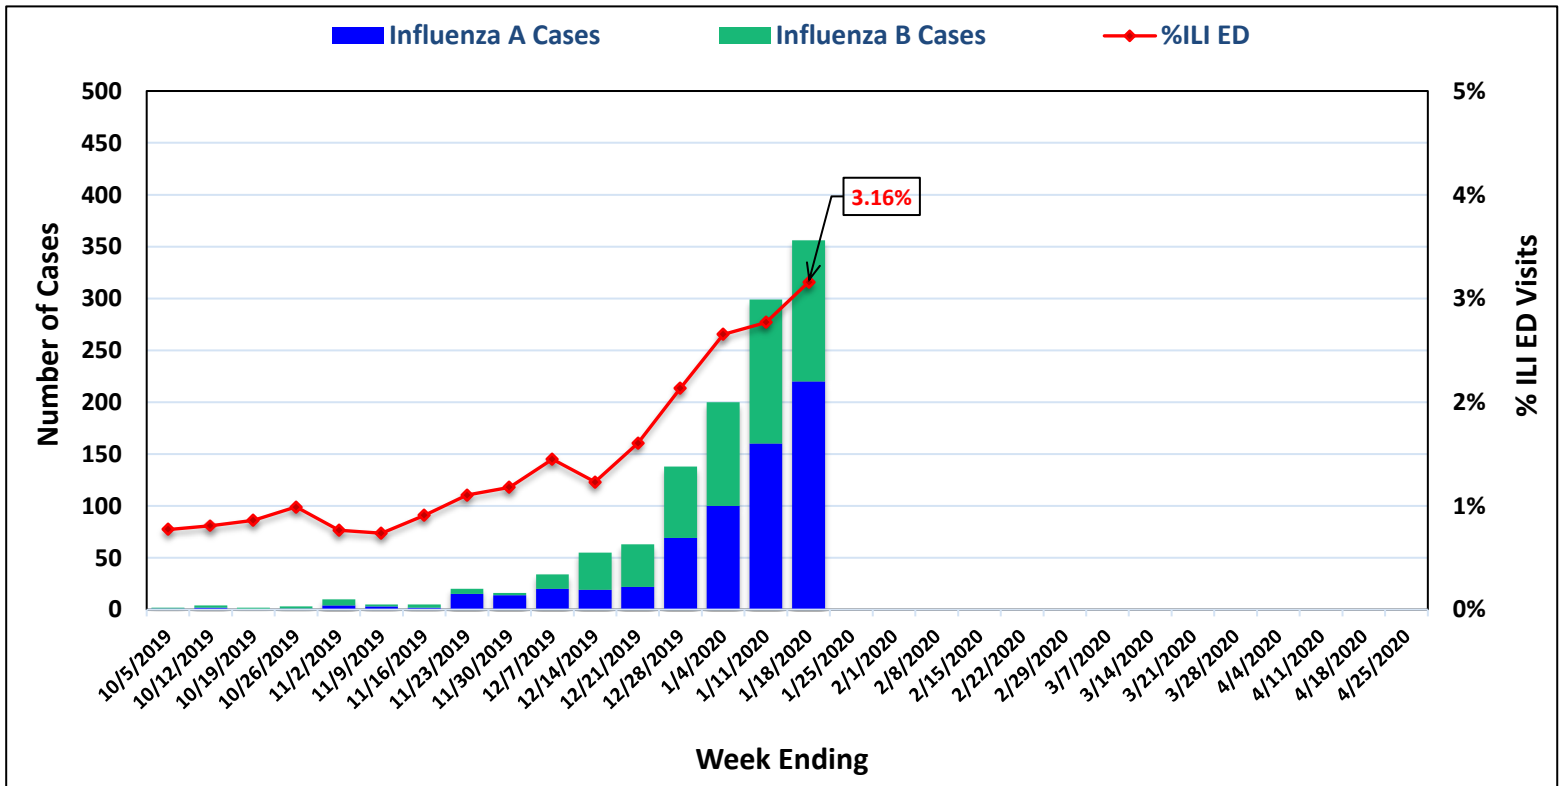

Cases of influenza diagnosed in Boston and confirmed by any laboratory test must be reported to BPHC by calling (617) 534-5611 or faxing reports to (617) 534-5905. [For case report forms Click Here.](#)

*Influenza-like illness (ILI) is defined as "flu" OR "fever AND (cough OR sore throat)" in ED chief complaint data captured by BPHC Syndromic Surveillance System.

**Massachusetts and CDC employ a different methodology than the City of Boston to calculate %ILI. Both Massachusetts and National ILI data are calculated using ILInet outpatient surveillance data from sentinel sites. [For more information Click Here.](#)

+State & national ILI data obtained from CDC's FluView Report. [Click Here for FluView.](#)

Figure 1. Weekly Reported Influenza Cases (in Boston Residents) and % ILI ED Visits, 2019-2020 Season

For the week ending 1/18/2020, ILI accounted for 3.16% of ED visits, an increase of 0.39% from the prior week.
