Influenza A and B	14 (0.4%)
Influenza (type unspecified)	0
TOTAL (season-to-date)	3179

Boston ED ILI Surveillance*	
This Week ILI% (Week 6)	5.16%
Last Week ILI% (Week 5)	4.76%
State/National ILI Surveillance**, +	
This Week Massachusetts ILI% (Week 6)	6.27%
This Week National ILI% (Week 6)	6.78%

Season-To-Date Hospitalization (through MMWR WK 6)		
SEASON	# HOSPITALIZED	% HOSPITALIZED
2019-2020	305	10
2018-2019	284	17

Summary: As of 2/8/2020, a total of 3,179 cases of laboratory-confirmed influenza in Boston residents have been reported to the Boston Public Health Commission (BPHC) since 9/29/2019. Three hundred and five cases (10%) have been hospitalized. Since the beginning of the season, two influenza-associated deaths in older Boston residents with multiple medical conditions have been reported. Nationally and statewide, only pediatric flu-related deaths are reportable. No flu-related pediatric deaths have been identified in Boston residents. Emergency department visits for influenza-like illness (ILI) comprised 5.16% of all Emergency Department (ED) visits this week. Geographic distribution of influenza activity in Massachusetts is *widespread*. Intensity of ILI in the State is *high*.

Providers should continue to offer vaccine to all persons ≥6 months of age until May.

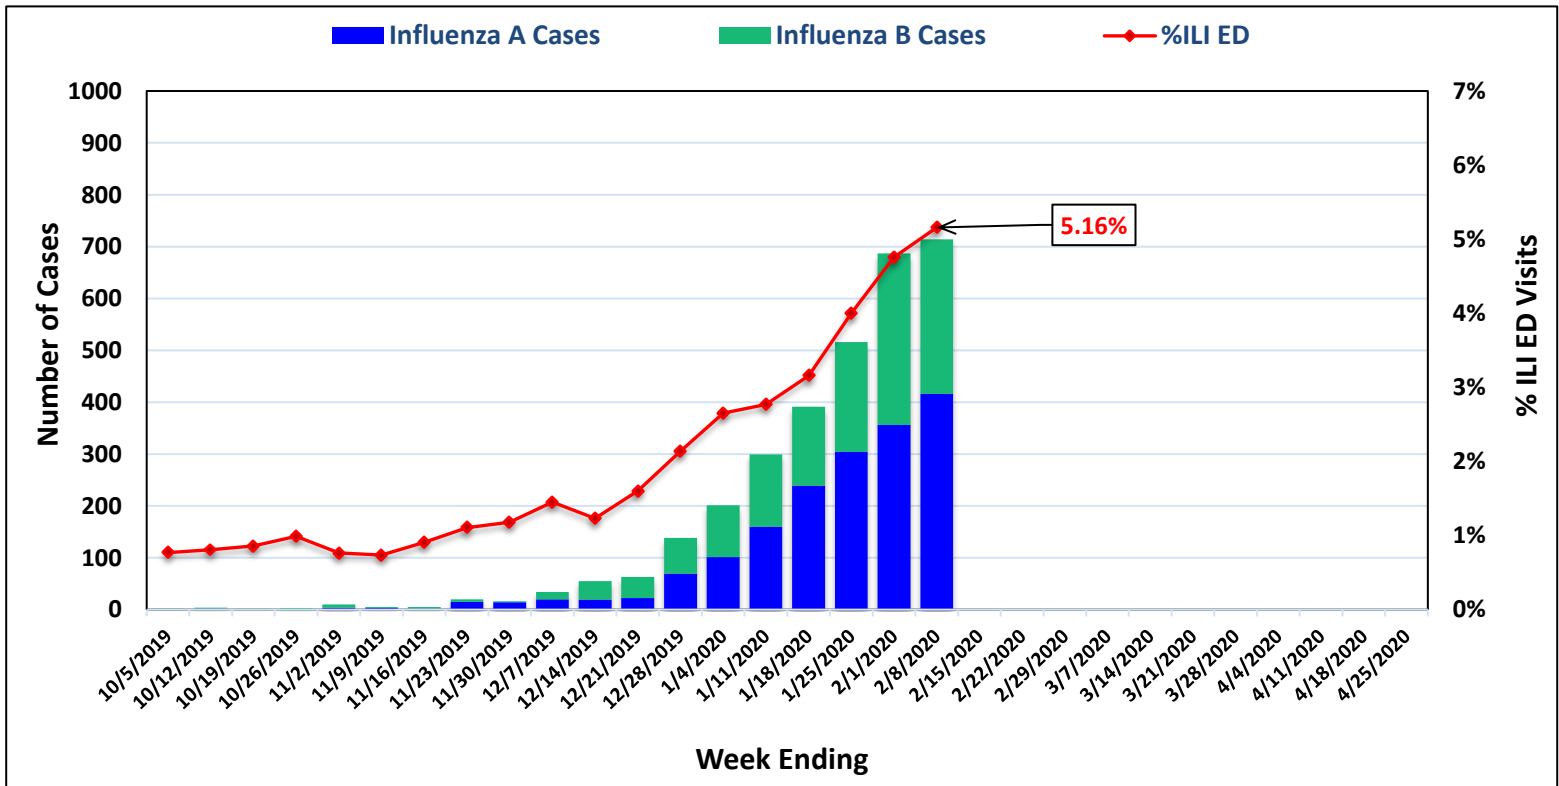

Cases of influenza diagnosed in Boston and confirmed by any laboratory test must be reported to BPHC by calling (617) 534-5611 or faxing reports to (617) 534-5905. [For case report forms Click Here.](#)

*Influenza-like illness (ILI) is defined as "flu" OR "fever AND (cough OR sore throat)" in ED chief complaint data captured by BPHC Syndromic Surveillance System.

**Massachusetts and CDC employ a different methodology than the City of Boston to calculate %ILI. Both Massachusetts and National ILI data are calculated using ILInet outpatient surveillance data from sentinel sites. [For more information Click Here.](#)

+State & national ILI data obtained from CDC's FluView Report. [Click Here for FluView.](#)

Figure 1. Weekly Reported Influenza Cases (in Boston Residents) and % ILI ED Visits, 2019-2020 Season

For the week ending 2/8/2020, ILI accounted for 5.16% of ED visits, an increase of 0.40% from the prior week.
