Influenza A and B	15 (0.4%)
Influenza (type unspecified)	0
TOTAL (season-to-date)	3706

Boston ED ILI Surveillance*	
This Week ILI% (Week 7)	4.21%
Last Week ILI% (Week 6)	5.16%
State/National ILI Surveillance**, +	
This Week Massachusetts ILI% (Week 7)	5.50%
This Week National ILI% (Week 7)	6.10%

Season-To-Date Hospitalization (through MMWR WK 7)		
SEASON	# HOSPITALIZED	% HOSPITALIZED
2019-2020	351	10
2018-2019	321	17

Summary: As of 2/15/2020, a total of 3,706 cases of laboratory-confirmed influenza in Boston residents have been reported to the Boston Public Health Commission (BPHC) since 9/29/2019. Three hundred and fifty-one (10%) have been hospitalized. Since the beginning of the season, two influenza-associated deaths in older Boston residents with multiple medical conditions have been reported. Nationally and statewide, only pediatric flu-related deaths are reportable. No flu-related pediatric deaths have been identified in Boston residents. Emergency department visits for influenza-like illness (ILI) comprised 4.21% of all Emergency Department (ED) visits this week, a drop of 0.95% from the prior week. Geographic distribution of influenza activity in Massachusetts is *widespread*. Intensity of ILI in the State is *high*.

Providers should continue to offer vaccine to all persons ≥6 months of age until May.

Cases of influenza diagnosed in Boston and confirmed by any laboratory test must be reported to BPHC by calling (617) 534-5611 or faxing reports to (617) 534-5905. [For case report forms Click Here.](#)

*Influenza-like illness (ILI) is defined as "flu" OR "fever AND (cough OR sore throat)" in ED chief complaint data captured by BPHC Syndromic Surveillance System.

**Massachusetts and CDC employ a different methodology than the City of Boston to calculate %ILI. Both Massachusetts and National ILI data are calculated using ILInet outpatient surveillance data from sentinel sites. [For more information Click Here.](#)

+State & national ILI data obtained from CDC's FluView Report. [Click Here for FluView.](#)

Figure 1. Weekly Reported Influenza Cases (in Boston Residents) and % ILI ED Visits, 2019-2020 Season

For the week ending 2/15/2020, ILI accounted for 4.21% of ED visits, a decrease of 0.95% from the prior week.
